

XenTegra

PARTNER MICRO ASSESSMENT

CORE NETWORKING

The network is critical to any IT strategy being implemented or planned. Our goal is to enable you and your team to ensure your network is prepared to handle any cloud, business continuity, or remote work strategy today and into the future.

ASSESSMENT GOALS

We will assist you in identifying strengths, weaknesses, opportunities, and threats (SWOT Analysis) in your network architecture and present you with features and benefits that you may not be leveraging today.

ASSESSMENT PROCESS

One of our senior XenTegra consultants will devote up to four hours remotely or on-site to collaborate with you and your team around your network architecture. We will provide a documented deliverable of findings and recommendations.

ASSESSMENT VALUE

XenTegra may find issues, considerations, or gaps with your network architecture. We will evaluate each feature, setting, and consoles to see how the network is being used. XenTegra will make sure you are getting the most out of your investment.

ABOUT XENTEGRA

XenTegra is a national value-added reseller that specializes in IT managed services and consulting, focusing on the security, performance, and agility of the end-user compute workspaces, on-premises, and in the cloud. We provide value by assisting and advising customers with the integration and implementation of our core technologies into a solution that allows clients to futureproof their digital transformation initiatives.

WHY CHOOSE US

- ✓ We are a top-tier national partner with a foundation in end-user compute
- ✓ We invest in our customers through enablement events.
- ✓ We enable IT so your end-users can be successful
