

XenTegra

PARTNER MICRO ASSESSMENT

As a VMware Partner, we assist you in getting the most out of your vSphere environment by providing a Micro Assessment of your existing VMware vSphere environment. We will determine configuration changes that should be made to improve the user performance, security, and management of the solution following VMware recommended practices to ensure your digital workspace environment is in a supportable configuration.

ASSESSMENT GOALS

We will assist you in identifying strengths, weaknesses, opportunities, and threats (SWOT Analysis) in your VMware Horizon environment and present you with features and benefits that you may not be leveraging today.

ASSESSMENT PROCESS

One of our senior XenTegra Consultants will devote up to four hours remotely or on-site to collaborate remotely with you and your team. Together we will review your VMware vSphere environment and provide you with a documented deliverable of findings and recommendations.

ASSESSMENT VALUE

Using VMware best practices and recommendations, XenTegra may identify concerns, issues, or deficiencies in the environment's current state. XenTegra strives to ensure you are getting the most out of your VMware Horizon investment.

ABOUT XENTEGRA

XenTegra is a national VMware Partner that specializes in IT managed services and consulting, focusing on the security, performance, and agility of the end user compute workspaces, on-premises, and in the cloud. We are fueled by a passion for end- users and known for our deep history with VMware and complementary technologies.

WHY CHOOSE US

- ✓ We are a top tier national VMware partner specializing in datacenter virtualization
- ✓ We invest in our customers through enablement events
